Unit 2: Classes – Unit Targets Linked to Resources

Proficient (1-5)	Target	Extra Practice	Review With (self / teacher / peer tutor)	Date Due
	I can define and identify the following based on syntax and context clues: parameter, parameter type, visibility, method, return type.	Peer Instruction 1		
		Parsing Coin PPA		
		Parsing Account PPA		
	I can define instance variables for a class with the appropriate visibility.	Peer Instruction 2		
		Warmup 1		
		CSAwesome 5.1.2		
		Door PPA		
		Vending Maching PPA		
		Rectangle PPA		
		Review 1		
		Required Practice		
	I can define the default and non-default constructors of a class.	Peer Instruction 3, 4		
		Warmup 2, 3		
		CSAwesome 5.2		
		Door PPA		
		Vending Machine PPA		
		Review 3, 10		
		Required Practice		
	I can define accessor and mutator methods of a class.	Warmup 4, 5, 6		
		CSAwesome 5.4, 5.5, 5.6		
		Door PPA		
		Vending Machine PPA		
		Rectangle PPA		
		Review 2, 9		
		Required Practice		
	I can define the toString method of a class.	Warmup 9		
		CSAwesome 5.4.1		
		Rectangle PPA		
		Required Practice		
	I use the Scanner class to read a variety of input from the terminal and store those values in variables.	Peer Instruction 5		
		String Parsing PPA		
		Review 14		
		Required Practice		
	I can write code that applies the length, substring, and indexOf String methods.	Peer Instruction 10		
		Warmup 8		
		CSAwesome 2.7.1		
		String Parsing PPA		
		Psuedocode 1 PPA		
		Review 12, 13		
	I can describe operators, precedence, promotion, and casts and evaluate code that depends on these concepts.	Peer Instruction 6, 7, 8		
		Warmup 7		
		CSAwesome 1.4.4, 1.4.5, 1.6		
		Milk PPA		

		Annuity PPA		
		Pseudocode 2 PPA		
		Review 8, 11		
		Required Practice		
	I can apply my understanding of variable scope (local, parameter, instance) and how values are passed to methods to trace code and determine the value of variables.	Peer Instruction (slides 17, 20)		
		Review 4, 5, 7		
		Trace PPA		
	I can compare and contrast the behavior of the static keyword on variables and methods and its impact on code using those variables and methods.	Peer Instruction 9		
		Annuity PPA
